-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Varanasi et al in view of Wilson et al (WO 021064895).

The former provide full response to the base claims except for the second bottle, with the wicking device 43 and the mounting arrangement of Fig. 13.

Wilson et al in Fig. 9 teaches the concept of two bottles residing on a bowl rim mounted dispenser. It would have been obvious to the ordinary artisan to provide for the former to employ two containers as taught by the

latter as the latter is taught in an identical art device as that of the former. Claim 2 is met by Wilson et al as the channels 87 are directed inwardly of the rim. Re: claim 5, see Fig. 8 of Varanasi et al for the openings

at 38. See element 84 for claim 9. Re: claim 11, as seen in Figs 1-3, the bottle of Varanasi et al is arcuate. The same design would be expected if two bottles were employed. Re: claim 14, as seen in Figs. 6 and

11A the base of Varanasi et al is arcuate. Re: claim 16, see tabs 178 of Fig. 26, which meet the function of securing the bottle in the base.
